Telecommunication major added to curriculum

A new academic major in telecommunication will be added at George Fox College starting this fall.

"It is clear to us that the establishment of a major in the television field is timely. The burgeoning cable television industry and the high demand for trained people to assist business and industry prepare training films necessitates this move to an academic major," George Fox Interim President William Green said in announcing the new program Thursday (March 3).

George Fox becomes the only Christian college in the West and one of only a few in the United States with such a program.

Establishment of the new major will require the addition of nine new courses in telecommunication and the addition of one full-time equivalent faculty member.

A student in the major will take a total of 36 hours in telecommunication courses, 8 hours of electives in communication or writing and 16 hours in required core liberal arts courses, for a total of 60 hours in the major leading to a bachelor of arts degree.

Creation of the new major is made possible without large expenditures because of an already existing Television Center on campus, constructed in 1979 through \$535,000 in grants from the M.J. Murdock Charitable Trust. The Center was

established at that time primarily to produce videocassettes of classes for distribution to the off-campus public. The Center has produced ten videocourses with a total of 247 separate programs in the areas of business, science, psychology, art and physical education.

The Center also contracts with agencies, businesses, and institutions for custom production. On a limited basis, without a major, the college has offered some courses in television production, with students doing production work as part of their laboratory/field experience courses.

The Center contains recording studio, offices, audiovisual control room and other production areas. It is fully equipped with television cameras, editing and duplicating equipment. All that is needed in new equipment to allow the major is smaller, more portable video cameras and recorders for student field use. Additional library holdings in the field also must be purchased.

Although the new major requires the equivalent of one additional faculty member, no new personnel are required because present Television Center staff members will be employed to teach the course.

The program will have an enrollment limit of approximately 40, dictated by the size of the Television Center

and available equipment. Some students already on campus and taking existing courses are expected to be the first graduates in the new major, the 25th at the college.

New courses will include Introduction to Film and Television, Introduction to Media Writing, Directing for Television, Editing for Television, Basic Electronics for Television, Audio Techniques, Advanced Video Techniques, Set Design and Lighting, and Broadcast Standards, Law and Ethics.

Required core liberal arts courses will be Critical Approaches to Communication, Mass Media and Popular Culture, Introduction to Communication Theory, and a choice of Ethics, Aesthetics, American Thought and Culture, or Christian Motifs in Literature. All already are offered.

The liberal arts emphasis along with the instruction in the broadcast medium is important, according to Michael Graves, chairman of the Division of Communication and Literature, in which the new major will be offered. He notes the new major is "solidly within a liberal arts framework and perspective."

"We do not seek to turn out another generation of dial turners unconcerned with the philosophical, ethical, social and psychological implications of the technology they fondled or embraced," Graves said.

"We asked ourselves whether we could come up with a major that went beyond training and was truly an education."

In approving the major, the college's faculty endorsed a written recommendation that said, "There is little doubt that telecommunication is a burgeoning field and that jobs will be available to qualified persons. It follows that with an acceptable telecommunication curriculum in place, George Fox College can hope to attract students with an interest in telecommunication

who would normally seek their undergraduate education elsewhere."

The report noted, "Institutions such as public agencies, local churches, parachurch organizations, and education systems are venturing more readily into situations that rely on media production. Rapid growth in the cable TV industry, community access TV and the independent network arena has created a need for educated personnel."

Alumni to comment on college

George Fox College's Alumni-in-Residence program will be renewed this year with the acceptance of two couples to participate.

The last Alumni-in-Residence visit was in 1979, and this year's visits will be the fourth and fifth.

Selected by the GFC Alumni Board for participation are John Slivkoff, a 1979 GFC graduate and DeForest (Woody) Fletcher, a member of the Class of 1953 and his wife, Gwen.

Slivkoff is director of Ecola Hall Bible Study Center at Cannon Beach, Ore., and Fletcher is an instructor of graphic arts for Puyallup, Wash., schools.

Slivkoff visited Mar. 3-5, and the Fletchers Mar. 30-April 1.

The program calls for the participants to "share and experience firsthand the George Fox College of today." They will stay in campus residence hall guest rooms, eat in the dining commons, visit classes, share informally with students and faculty and attend chapels and other events of their choosing.

Following their stay they will give a written report of their impressions to the Alumni Board and to the President's Office within a week of their visit. They will be asked to comment on spiritual life, student life, academics and other general observations.

That information is then shared with various persons and departments as appropriate.

Computer may become part of library

Having trouble with homework? Soon, you might have a computer available for you to help you out.

Shambaugh Library and the George Fox College Computer Services are trying to determine whether to get a computer for student and faculty use. The new computer would aid people in studies and research.

A survey was sent to students to measure the interest in the new computer

John Spady from the department of Computer Services said that official results from the survey are not available yet, but so far there seems to be a lot of interest from the George Fox community in a computer.

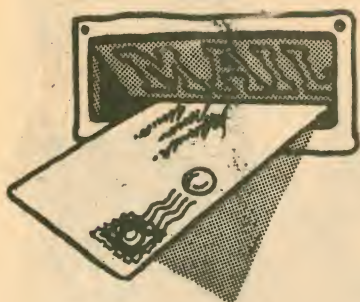

Reference librarian Merrill Johnson said that a new computer would help students in all academic areas of study. "A computer would modernize the learning process here," he commented.

"A word processor as well as computer software additions could be added to the system," said Johnson. "Students could even bring their own software for use on the computer."

In addition, free seminars would be provided for students and faculty for use of the computer if it is decided to purchase one. Persons using the computer would be required to pay a fee per hour to help offset the cost of the service.

Mark Serfling uses computer in Wood-Mar.

To the Editor:

All opinions in this section, including editorials, are the opinions of the individual writers and not necessarily the opinions of the staff of The Crescent, the Associated Student Community, or the Administration of George Fox College.

To the Editor:

Last issue's edition of the "Be Serious" column was more than I could stomach.

In it, serious charges were leveled against GFC's musical touring group, Dayspring, and particularly against Gene Hockett. However, not one bit of evidence was offered to back up the charges that the administrators who select Dayspring members discriminate against overweight applicants. Instead, the columnist treats his charges as fact, using snide remarks set off in parentheses (such as, "By the way, what if [the College's anti-discrimination code] weren't required by federal law?") to transform his tone from indignant to offensive. Obviously he believed his charges were justified before he even set pen to paper. But does he expect his readers to merely take his word for it?

I, for one don't. The columnist consistently strays

from his original theme (why the footnote about band members if the column is about auditioning practices?) and pays scant attention to correct grammar and sentence structure. ("Overweight is that simple human characteristic..."). He even brings God in to back up unsubstantiated arguments. By the time I reached the final paragraph, the columnist's credibility was past salvaging. I was not only skeptical of his point of view, but offended at what seemed to be an attempt to make me feel guilty for my understandable skepticism: "...if you don't happen to like what I write, then just never mind. (Either that or you're skinny.)"

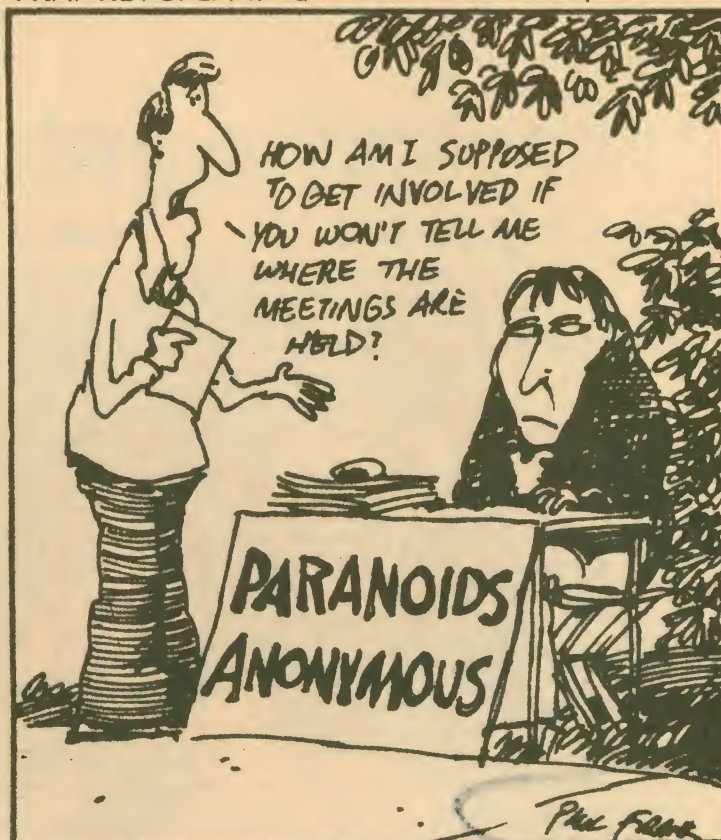

The fact is, in the three years I've been here I've seen plenty of overweight and underweight figures mixed in with the model figures in all the music groups at this college — including Dayspring, including this year.

The columnist justifies his own tendency to "refrain from socializing with some overweight persons" by pointing out that personality conflicts with those persons were the main reasons why he didn't get along with them. And yet he doesn't allow for the possibility that Gene Hockett and the other judges may have had valid criteria in choosing or not choosing overweight applicants.

Anytime an audition is held, a handful of disgruntled people who didn't get parts are consequently certain they have been slighted. Since none of the columnist's charges are supported with concrete evidence, I can't help suspecting that someone has been griping to the columnist, complaining that he or she didn't get a fair shake. But is there any possibility that this person (or persons) didn't make Dayspring because he or she doesn't sing as well or

blend as well as the applicants who were chosen, or doesn't fit some other important criteria? If there really is a controversy here, why not give us the facts and let us decide for ourselves?

I have to give the writer of this column some credit; after all, I'm not taking the time and energy to contribute to every issue of *The Crescent*. But if he's going to write a column,

why not deal with something really significant, something that affects a larger majority of students? And why not give readers credit for a little intelligence? No, I'm not overweight, but that's not really the point. I don't happen to like what's being written, and I think my opinion is worth considering.

Darleen Moch

Be Serious!

[Handwritten signature]

Do you happen to recall the story in the last issue concerning the typesetter? Well, it had some incorrect information in it; please disregard it. Correct details later.

Second: Gene, please forgive me for not upholding the conflict/confrontation model that this campus upholds. Thanks.

Third: Eric, the easiest way to solve a problem is not to condemn it but to offer possible solutions.

Fourth: ...NOTICE TO ALL READERS: Do not forget the title of my column! (Be serious! — For those with a reading impediment.)

Fifth: For a change, and also because I'm tired (of what, you ask?) and run down, I am having a guest writer take over for me.

We switch you now to our rambling reporter on the streets and in the slums... Kyle Fenton. (And if you don't like it, then lump it.)

First of all, thanks to Matt for letting me write. I suppose that I, like Matt, could also be considered the open minded/open mouthed type. Those of you who know me already know this to be true. For those who don't, you will soon.

Today's topic, boys and girls, is maintenance. Can you say maintenance? I thought you could. Let me say first off that this is not an attack on any one person on the maintenance staff, but just some concerns that others have expressed to me.

Since music is a large part of my life, I spend a lot of time moving equipment between Ross Center and Bauman Auditorium. Only one student

has a key to Bauman (the band manager) and that key works only for the back door. A lot of times it is impossible to find that student, or anyone else for that matter, who can open doors so we can get in an practice in "our" auditorium. I can understand chains on the doors at nights and on weekends but, during the day, when all the backstage doors are locked it is very hard to get in when you really need to. If a building is for the use of the students, then shouldn't the students be allowed access to it? A certain group of students who were looking for a place to take Alpha Kappa Psi pictures were told, with a very "snotty" tone of voice, that they could not unless they went through some red tape. To change tracks for a second, I can see their (maintenance's) point (sort of). After some of the things that have happened in there, I'd be hesitant too. But to keep students from taking club pictures? Be serious!

Every Tuesday and Thursday morning, the Central Committee meets in the Chehalem Room. The room is reserved at 9:15 on these mornings. Every meeting day this term, the ASCGFC president has had to call the Physical Plant to open the door. (These calls are made at 9:30.) That's right, every time. If this is their job, why can't they do it — and do it with a good attitude? I could understand forgetting every once in a while, but every morning?

I think that many problems could be lessened or solved by an attitude check. It's been more than once that I've been made to feel like "scum" by a look or comment from a

maintenance employee. Now, for the most part, their attitudes are pretty good. But when things don't go their way, they have been known to act with an attitude that is not exactly "Christian." I'm not judging their Christian lives, nor am I saying that my attitude is perfect, but I'm just saying that it should be watched. Recently, I called the Physical Plant to have them open the Chehalem Room for a Central Committee meeting (at 9:27). After I said that we had the room reserved for 9:15, I asked them to come over as soon as possible. After a sarcastic "okay", I was politely hung up on. It's things like this that cause students to think badly of the maintenance department. I really want to get along with them, and I do with some. I think that if maintenance would watch their attitudes, then students would be more inclined to see some of their points. If this were to happen, then things could only get better!

Lady Bruins ranked near top in region

George Fox College's women's basketball team split its final two regular season games, losing to Linfield 70-60 in McMinnville Feb. 22, then coming back two nights later to conquer Judson Baptist 87-62 in Newberg.

The season's not over for the lady Bruins, however. The GFC squad, second in the WCIC league, also is rated high in the National Christian College Athletic Association Region 8 standings, perhaps at the top, and they await final word on a NCCAA playoff tournament.

Bruin Coach Craig Taylor believes last week's victory over Judson puts his team first in seeding with Judson, Warner Pacific, and Trinity Western of Canada.

The winner of the NCCAA regional playoffs is eligible for a trip to Tennessee for national competition. Although Taylor feels his squad has a strong chance to grab the regional title, he says participation in the nationals would be nearly impossible because the NCCAA does not provide finances for the national trip.

Five lady Bruins shot in double figures in the win over Judson Baptist. The Bruins outrebounded the Crusader by 15 in the game that put GFC's

season record up to 10-12.

"I felt good about tonight," Taylor said after the win, pleased with his team's offense and defense "for the most part."

The Bruins led the first half as much as 11 points, yet were ahead only by two after 20 minutes. Coming back for the second half tip-off, sophomore Shawna Chandler, Newberg, dominated the toss and then put in two quick baskets to give the Bruins a quick start after the half.

Sophomore forward Melody Groeneveld, Camas, Wash., shot 50 percent from the floor and netted seven free throws to total 27 points. Senior forward Debby Zahler, Newberg, put in seven of 13 from the field and five for six from the line to score 19.

Also in double figures for the Bruins were freshman guard Laura Hendricks, Bozeman, Mont., Roxy Cate, Enitat, Wash. senior guard, and Chandler. Hendricks collected 13 points, which included a 100 percent free throw shooting at seven. Cate and Chandler had 20 points each.

Groeneveld led George Fox in rebounds with 14, followed by Chandler with 10 and Zahler with eight.

"Outrebounding them by 15

Lady Bruin coach Craig Taylor gives encouragement to team.

was the key," Taylor said of the win. "We also forced 29 turnovers out of them to our 17."

In the game with Linfield, the Bruins' low shooting percentages from both the line and field put them behind the entire game. GFC's usual top scorer, Groeneveld lost a contact prior to the game and had trouble adjusting her depth perception with glasses. She hit just three

of 17 for seven points, well below her 20.2 season average. Groeneveld's teammates were unable to pick up the lag in scoring.

In the Linfield contest Hendricks produced a college high of 16 points to be the only Bruin in double figures. Zahler led in rebounds with 15 followed by Groeneveld with 12.

"We had 26 turnovers which was too high," Taylor said,

"We weren't taking care of the ball and they converted our turnovers."

The loss to Linfield put the Bruins' WCIC conference record at 6-4. George Fox, which won the championship title last year, placed second to Pacific University in conference play this season.

GARFIELD® by Jim Davis

General Ed. Revised

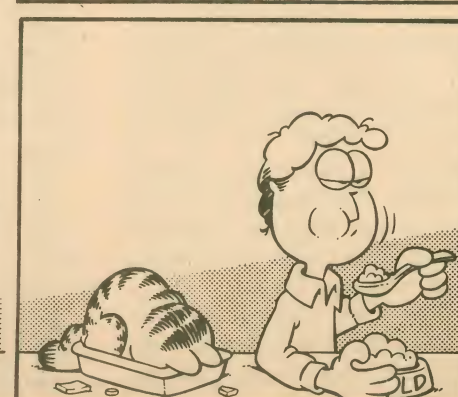

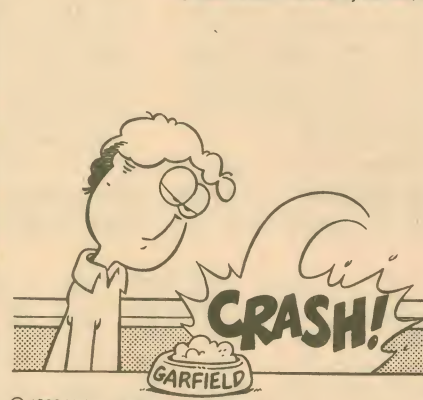

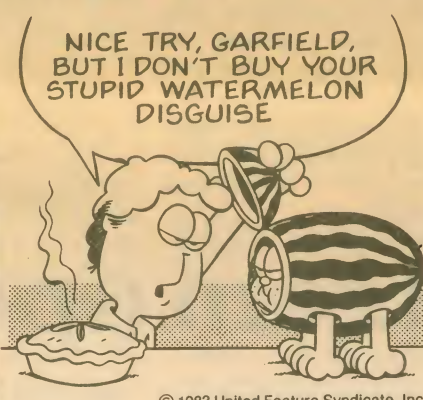

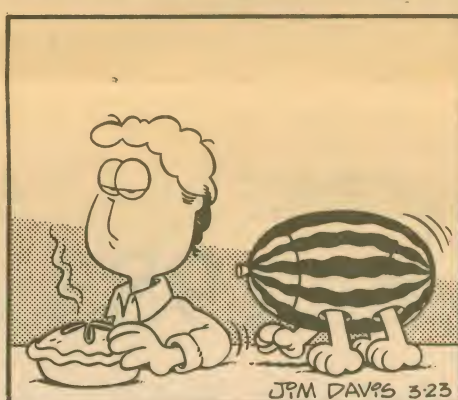

A proposal to revise the general education requirements has been presented by the General Education Committee to the George Fox Faculty for their approval. If approved, additional general education requirements would go into effect for freshmen during the 1983-1984 school year.

Associate Dean Lee Nash said current General Education standards were out of date and needed to be revised. "Our current requirements are below average in comparison to other schools in the Christian College Consortium," said Nash. "We need a revival of the required courses to provide more cohesion and common experiences to students in different majors."

The proposed revised requirements show an eight and a half hour increase over the present system. Under the new requirements, students would take a total of 24 hours of literature, history, and science, 8 hours in each subject. Currently students are only required to take 20 hours of these subjects.

All students would also take either a philosophy or ethics course under the new system. Freshmen would be required to take a one credit Introductory Freshman course. This course would introduce new students to the academic life of the college.

Several divisional meetings and committee hearings on the proposals will take place before a faculty decision is scheduled to be made on April 5. If approved, most of these revisions won't take effect until the 1984-85 school year. Dr. Nash said, though, that the Introductory Freshman course could be adopted as early as the 1983-84 school year.

Sports

Bruins await NCAA playoffs

COMING UP:

George Fox College's basketball Bruins took three days off last week (Feb. 28-Mar. 2) to start a 12-day period between the end of the regular season and the start of post-season playoff action in the National Christian College Athletic Association.

With an 85-71 win Saturday night (Feb. 26) over Judson Baptist at The Dalles the Bruins moved their record to 14-15. But more importantly, the win gave the Bruins second place in the NCCAA Region 8 playoff race and a first round bye in the playoffs, which start tonight, Mar. 10. Warner Pacific also draws a first-round bye.

Four other Oregon Christian college teams will play in the opening round, with the two winners meeting GFC and Warner on Friday night, Mar. 11. The highest seeded teams will continue to host the lowest seeded teams until a regional champion is determined. The winner plays in the NCCAA nationals in Chattanooga, Tenn.

LOOKING BACK:

A split in weekend games gave Bruin Coach Mark Vernon a 14-15 regular season mark in his first year of collegiate coaching. The Bruins lost in the final minute to visiting Northwest Nazarene, 67-64, Friday night (Feb. 25) then rebounded with an 85-71 win over Judson Baptist Saturday in The Dalles.

The victory at Judson, the second of the season over the Crusaders, featured a 29 point turnaround. The Bruins were down by 12 points late in the first half before rallying with 10 straight points, outscoring Judson 14-2 in the final 4½ minutes to tie the game at 36 all at the break.

After 90 seconds in the second half the Bruins were never again behind, and, holding the Crusaders scoreless for four minutes in the opening of the second half, jumped to a 10 point lead (56-46) after 10 minutes of action. That lead grew to 17, by the final minute, 83-66, as Vernon played his bench.

GF's Randy Dunn netted 29 points and grabbed 17 rebounds in the win with forwards Dave Mauermann and Brian Barkdull each adding 16 points. George Fox outrebounded the hosts 51-36 and came back after a first half shooting of .293 percent (12-41) to finish at .469 percent.

With Northwest Nazarene, the Bruins had a one point lead and the ball with less than 40 seconds remaining, but a crucial turnover cost the game. The Crusaders scored to move ahead 64-63 and that gave the ball back to the Bruins, but another costly turnover at eight seconds gave the ball back to the visitors. Two free throws with seconds left netted the victory for NNC, the first time it had won in Newberg in 11 seasons.

George Fox shot at a .452 pace from the floor (to .391 for NNC), and had one more field goal (28-27), losing the contest at the line, picking up eight points to 13 for the Crusaders, who led at the half 33-30.

In a battle between NAIA District 2-s top rebounders and scorers it was not contest. GFC's Randy Dunn put through 22 points and grabbed 15 rebounds. He held the Crusader's Mike Terpstra to a season low of seven points, 12 off his average, and Terpstra collected just seven rebounds after averaging 11.8. Going into the contest Dunn was second in the district in both rebounding and scoring with Terpstra at the top in rebounding and fifth in scoring.

Bruin Coach Mark Vernon leads team to Region 8 playoffs.

Baseball team opens 1983 season

The baseball Bruins are under the leadership of first-year coach Wade Witherspoon.

It's a young team with 11 of the 22 players freshmen or sophomores, eight of them freshmen.

"The program has nowhere to go but up," says Witherspoon. The Bruins were 5-25 a year ago. "We have a lot of returners with experience on this team and the ones who are not returners make up for lack of experience with talent."

"We have a lot of potential to do well," says Witherspoon. "If they put together what they've learned in practice, and don't make many mental mistakes, we're going to win the one-run ball games we lost last year."

Witherspoon was assistant coach a season ago, following two years with the Bruins as a catcher as a senior and an outfielder as a junior.

Witherspoon, named Most Inspirational in baseball last season, lead the Bruins in home runs as a junior. He came to George Fox after two seasons at Lane Community College where he led the Oregon Community College Athletic Association in hitting at .444 and was a first-team all-star selection. He is originally from Cottage Grove.

The 1983 Bruins will be lacking the power hitters to hit the long balls and a power pitcher to shut out opponents.

But Witherspoon points out that speed, depth, and no weak hitters in the lineup will make up the team's strengths.

The Bruins will be without a southpaw this year, but will have five strong starters and four relievers.

Among the key returners is senior pitcher Tom Evans, Cottage Grove, who won two games last year. Senior third baseman Dave Case, Newberg who led the Bruins a year ago with a .385 batting average also is back, as is junior outfielder John Votaw, Whittier, Calif., who broke the Bruin stolen base record with 25, and Scott Kwasnitza, a pitcher/right fielder combination.

The Bruins meet Eastern Oregon Wednesday in a single game, then Thursday and

Friday (mar. 3-4) participate in the Lewis and Clark State Tourney with three games. Saturday, George Fox is at Northwest Nazarene for two seven-inning contests.

About starting on the road, Witherspoon says, "It's going to be good to get out of the rain and go someplace where we can play."

"We'll be going up against some stiff competition, but we have a week after the trip to work on our mistakes, he says. But that following game also will be on the road with three games Mar. 11-12 in The Dalles in the Judson Baptist Tournament. George Fox's first home game is Mar. 25 with Eastern Oregon State. The Bruins will have 16 road games and 14 at home.
